

Db2 Attach's MRF Feature

Multi-Row Fetch

Business Challenges

The SoftBase **Db2 Attach** MRF solution can cut your DB2 FETCH statement CPU time.

Are you taking advantage of Db2's multi-row FETCH?

As a database professional, you know that reducing CPU processing and elapsed time translates directly into time and money saved. For large organizations, this can translate into millions of dollars in mainframe costs saved annually.

But there are several challenges to implementing multi-row Fetch in legacy Db2 applications

- Finding applications that can benefit from multi-row **FETCH is DIFFICULT**
- Developers **SPEND TIME** learning required coding techniques
- Recoding is **TEDIOUS** and **RISKS DAMAGING PERFORMANCE**
- Implementing can require **MONTHS OF TESTING** to ensure that the application's performance isn't compromised

- **Implement multi-row FETCH automatically NO RECODING REQUIRED!**
- **Significant CPU savings gives pause to expensive CPU Upgrade**
- **More overhead to run additional jobs and reduce risk of delaying critical applications**

SoftBase's MRF solution makes it easy!

SoftBase's patent-pending Multi-Row FETCH (MRF) feature of its Db2 Attach is a powerful new tool for automatically implementing multi-row FETCH in your existing batch DB2 applications no application coding changes required! With MRF, you can enjoy the performance improvements that natively coded multi-row fetch provides batch applications without tedious recoding and testing. In recent tests, the MRF feature demonstrated FETCH statement CPU time savings.

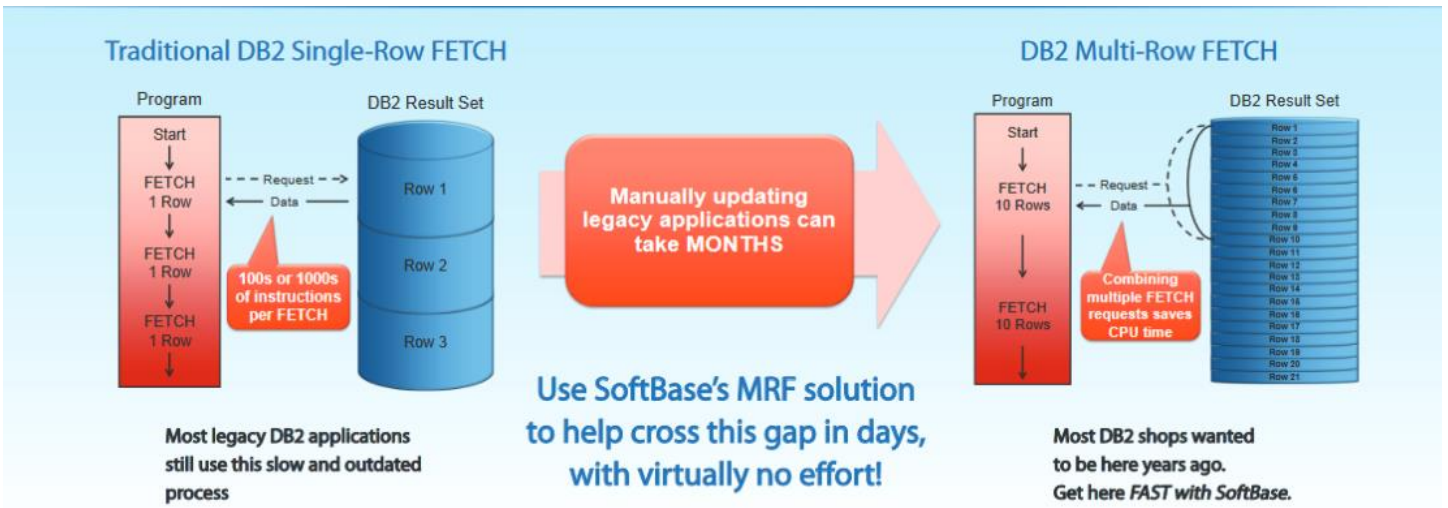

What can MRF mean for you?

- Bypassing months of coding and testing for **HUGE PRODUCTIVITY SAVINGS**
- Delaying a CPU upgrade for **HUGE MAINFRAME COST SAVINGS**
- Reducing risk of delaying critical applications **PREVENTS LOST REVENUE**

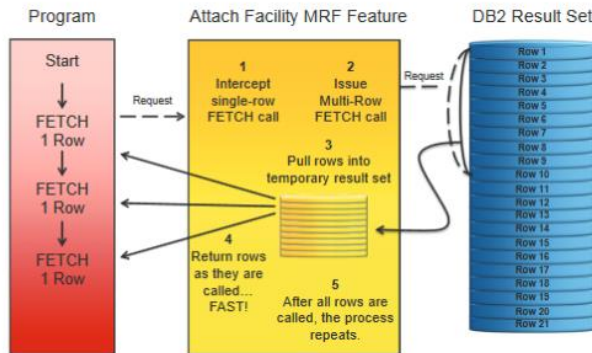

And, by using **SoftBase's Db2 Batch Analyzer's** free trial, you can estimate performance improvement before implementing **Db2 Attach's MRF** feature.

No commitment. Instant gratification. See how it works.....

Db2 Attach's MRF Feature

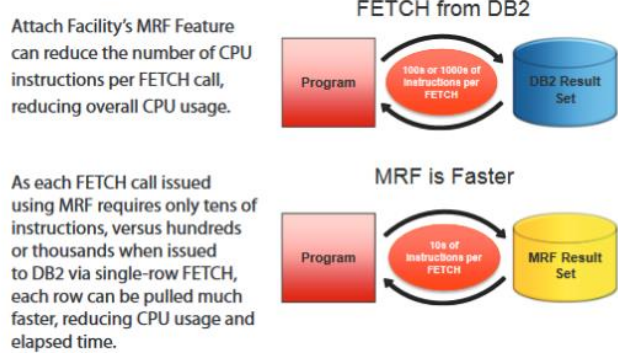

How does Attach Facility's MRF feature work?

The MRF feature for Attach Facility implements Multi-Row FETCH functionality in legacy applications **WITHOUT SOURCE CODE CHANGES**.

How does Attach Facility's MRF feature save CPU?

To determine if SoftBase's MRF solution is a fit for you, contact SoftBase today.
